

We will be creating fact-files all about ourselves in English. Help us at home by talking about things I like and enjoy such as my favourite music and foods.

Height and weight is the theme for Maths this term. Get those tape measures out at home and have fun measuring things!

In Computing we will be learning how to code and program. Sounds complicated but you can help by asking your child to follow some instructions as that's the basis for coding.

Families is the theme for PSHE and we will be learning all about families and how families might be made up.

In PE we will be competing in invasion game style sports! These include volleyball, football and tag rugby. At home you can pop some Rugby on the TV and discuss how the game is played.

During our Discovery days we will be studying Rocks and Fossils in Science, World music in Music and Our History in Humanities. We will also be looking at Easter Story in RE.

We will be listening along to different world instruments this term in Music. We will travel the world each lesson and discover a new instrument on each visit.
