

Yellow

Class

Learning

Letter

Yellow class will look at "Isimeme's Stories" as our text this half term.

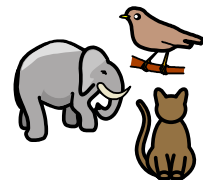

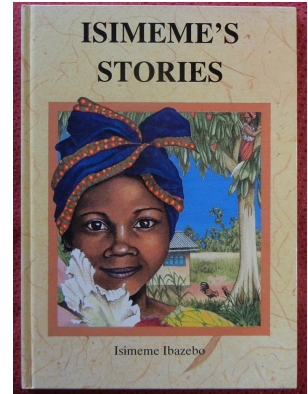

In Maths, all pupils will work towards their own targets, including number recognition, counting, addition and subtraction, sorting, and other related skills.

In Computing, we are working on basic skills and technology including our typing skills as well as our general ability on a computer.

Our Science theme focuses on animals and plants, we will be looking at lots of different species over the next half term.

For PE this half term, we will be working on our Athletics skills including our movement, running and jumping.

In our life skills lessons we will be looking at recycling and how we can reuse everyday things without throwing them away!

Pick one of the three activities below to try out at home!

You might choose to sit down with your child and read through the class text. If the weather is warm enough, you might read this to them or with them outside to capture the same feeling as Isimeme.

Your child could start recycling around the house for an independent task. Instead of putting everything in the bin, they could help you put things in the recycling basket instead!

For a healthy choice, you could try some different foods with your child. A fruit salad or a range of different home grown vegetables?

Please let one of the class team know which activity you tried!
